

CARE SURGICAL

CS Tony Prone

Patient support for use in the safe prone positioning of the conscious or unconscious patient.

Support the unconscious patient in the prone position.

The conscious patient can be supported in the prone position with head placed laterally.

Ensure the CS Tony Prone is positioned with the recess towards the patients hips.

It is recommended that the CS Tony Prone is placed on a firm procedure bed or table. Pillows or supports must be used to support the patient's head and legs.

Only to be used by trained clinicians. Do not exceed weight limit of the supporting table.

Head-to-Toe Check list

This check should be completed once the patient is in the prone position and before the surgical drapes are applied.
At all stages, check that no tubing is trapped between the patient and the supports, and that all bony protrusions are padded.

The head

- + Eyes lightly taped, no padding or goggles
- + Face supported on the cheeks and forehead
- + No pressure on the nerves around the eyes
- + No pressure or minimal pressure on the chin

Chest, abdomen and pelvis

- + ECG electrodes positioned on the patient's back
- + Breasts positioned medially with minimum pressure
- + Adequate space to avoid compression of the abdomen
- + Male genitalia free of the pelvic support

Neck

- + Chin and throat not touching the chest support
- + Natural neutral neckline

The arms

- + Arms forward and not abducted beyond 90°, or arms secure by the patient's side
- + No pressure on the axilla nerve
- + No body weight supported on the arms

Cleaning Instructions

Clean using standard hospital wipes

Do not immerse in water

Do not autoclave
