

**CARE SURGICAL**  
Specialists in Patient Positioning

### The CS Easy Shin Support™

- + Optimum pressure distribution due to increased contact surface
- + Exposed back of foot
- + Little to no pressure on the toes (suitable for a wide range of footsizes)
- + No pressure on the dorsals pedis artery

### Other Solutions

- Small (rounded) contact surface
- Pressure on the back of the foot
- Pressure on the toes due to them resting on the operating table
- Pressure on the dorsalis pedis artery
